DESCRIPTION

This project provides for the site selection, planning, design, and construction of a new 3rd District Police Station to serve Silver Spring and vicinity.

JUSTIFICATION

A draft Police Facilities Plan has been developed to ensure safe and efficient facilities are available to address the needs of County citizens. Replacement of the current Silver Spring District Station is included in the draft Plan. The existing Silver Spring District Station was constructed in 1962. The facility does not provide adequate work space for staff assigned to the station, lacks essential security features, is not equipped to accommodate future technology, has no public meeting space and requires replacement of major infrastructure components. Business, residential, and transportation patterns have changed leaving this primary facility at the far south end of the 3rd Police District.

Plans and Studies

Draft Police Facilities Plan, District Station Prototype Program of Requirements, Silver Spring Program of Requirements, Silver Spring District Assessment (1999), and Building Condition Study (2001). Pedestrian Safety will be considered during design.

Cost Change

Increase in permit fees and inflation.

STATUS

Site selection and acquisition. Continued facility planning based on site selection.

OTHER

Land acquisition will be funded initially through ALARF, then reimbursed by a future appropriation from this project. The total cost of this project will increase when land expenditures are programmed. Planning funds from the Facility Planning: Police project (#479452) were used to develop the prototype Program of Requirements (POR) and cost estimate for this project. The prototype district station is a 27,713 gross square foot facility consisting of two floors and surface parking. The first floor houses the public access area, operations, patrol and patrol support functions, and a small prisoner holding area. The second floor houses investigative units, staff support, and administration. A 1,200 square foot enclosed property storage area will also be constructed contiguous to the district station to store large storage items. The district station is a 24-hour per day, seven-day per week operation and provides support for beat teams. It is the command center for the satellite facilities within the police district. The district station will accommodate up to 161 department staff plus volunteers. Public space will be available to facilitate outreach with the community. A police substation to serve the core area of downtown Silver Spring will be constructed as a part of the Department of Fire and Rescue Services' Silver Spring Station 1 Replacement and will alleviate some crowding in the Police District Station. Site selection for the facility will include participation of effected communities. The County Council requests that once a site is selected, a site-specific POR be developed. The Council requests that the Division of Capital Development and the Police Department review whether the facility is sized to serve the County for 20 years after completion. The POR should reflect any special needs of the community being served. Requirements for distance learning in the District Stations should be coordinated with the PSTA Distance Learning Plan. The Council requests that the approved Facilities Plan and site-specific POR be provided by January 15, 2006.

APPROPRIATION AND EXPENDITURE DATA

Date First Appropriation	FY	(\$000)
